Solve the logic puzzle, determining which boxer stayed where, how they travelled to L&B, which type of letterbox they love, the snack they packed, and the tree they love to plant a box in. For purposes of solving the puzzle, cabins are located linearly next to each other, left to right, 1-5.

Answer the questions on the following page using the answers from the puzzle. The answers to the questions correspond to the letters used in deciphering the clue. Starting with the answer from question 1 and ending with question 9, arrange all the answers in a row. The letters will be numbered sequentially, then used to figure out the clue. (Boxers were picked randomly from confirmed attendee list and any attempt to represent a boxer here is totally made up by me and does not represent the actual boxer at all.)
